

Ceovishte Au-Ag-Cu Project

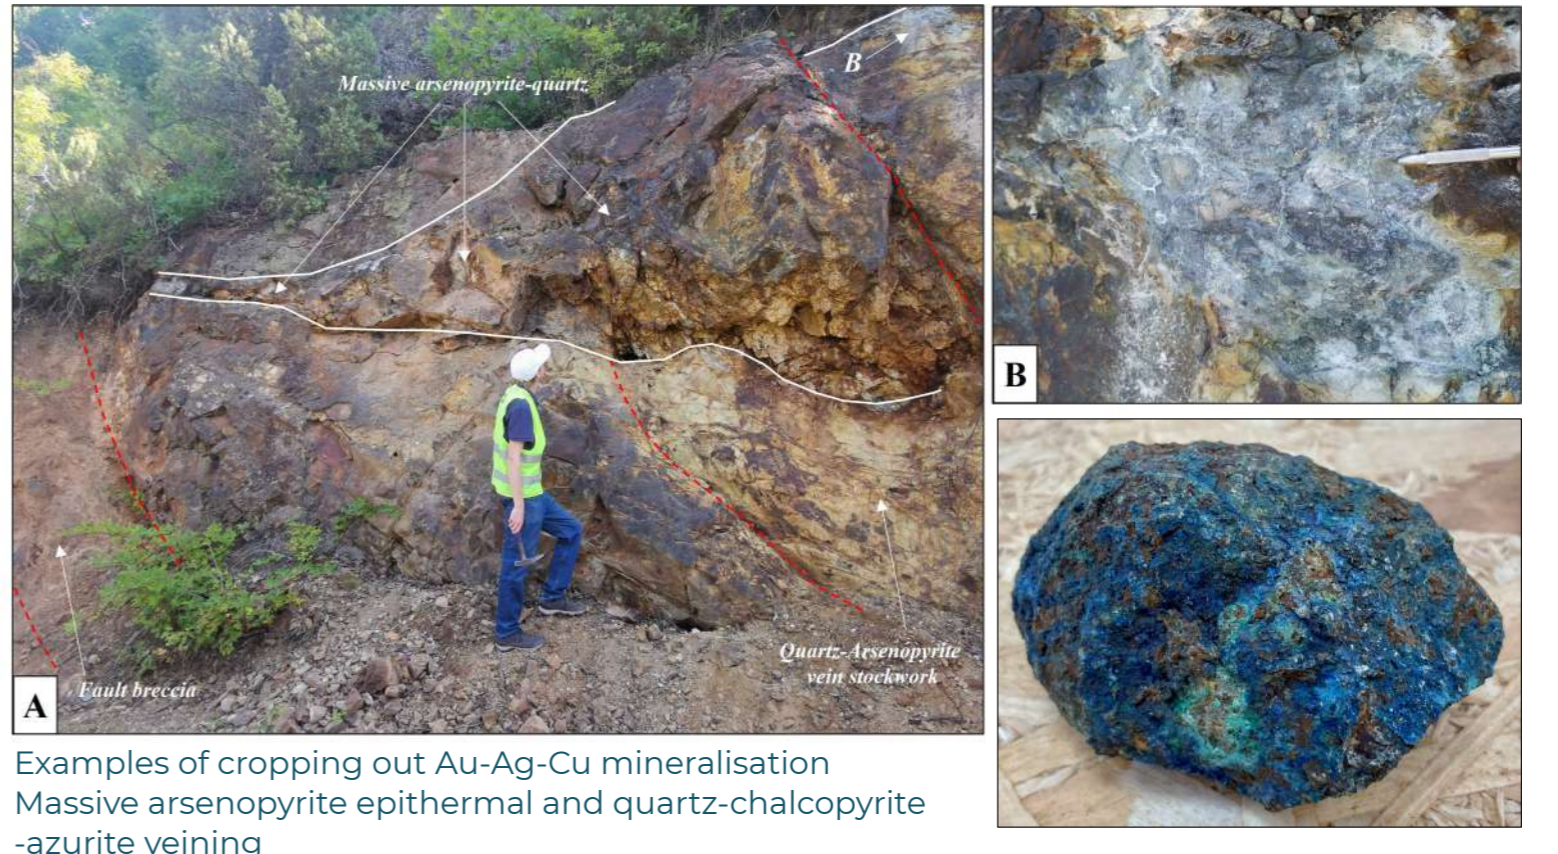

Data compilation - Medjurecje Drill Ready Target

Technical Notes

- Series of stacked epithermal veins within potassic altered microdiorites crops out at 2 separate locations >1.3 km apart.
- Rock chip samples up to 53.5 g/t Au and historic note of bonanza Au-Ag grades.
- > 900 m wide Au-Ag-As-Bi-Cu-Te soil anomaly discovered in NE of target area.
- Soil assays exceeding 2 g/t Au.

Examples of cropping out Au-Ag-Cu mineralisation
Massive arsenopyrite epithermal and quartz-chalcopyrite-azurite veining
